## Profile

---

Frontend Engineer with 3+ years of experience delivering scalable, high-quality web and app applications. Specialized in building responsive and accessible user interfaces, optimizing performance, and collaborating across teams to translate business requirements into robust technical solutions. Proactive in driving best practices, mentoring, and continuous improvement to support product and organizational growth.

## Professional Experience

---

**Frontend Engineer** 2024 – 2026 | Basra, Iraq

DevHouse [↗](#)

### Key Projects:

- **Taen** [↗](#): Developed a platform connecting companies with job-seeking employees, focusing on creating an intuitive and responsive user interface to streamline the job application process, while also supporting cross-team coordination by aligning development tasks with marketing and sales requirements to ensure smooth feature delivery and platform consistency.
- **Hoster** [↗](#): Contributed to a platform (website, app) offering domain registration and hosting plans in Iraq, collaborating with the Ministry of Labour to provide local businesses with accessible web hosting solutions.
- **CMC Iraq – Inspection & Compliance App**: Developed a centralized field inspection platform for regulatory compliance, segmenting Iraq into operational zones with map-based visualization to track inspections and company status.
- **Menu CMS**: Worked on a content management system for restaurant menus, enabling seamless updates and real-time menu management for businesses.
- **Middle East Car Rental**: Worked on the full development of the website and dashboard, implementing features for booking, fleet management, and real-time updates to enhance user and admin experience.

### Key Responsibilities:

- Develop and maintain responsive, user-friendly web applications.
- Coordinate with teams to design intuitive UIs and align development with business goals.
- Ensure mobile-friendly designs and optimize performance.
- Review code and integrate frontend with backend systems.
- Integrate third-party APIs for added functionality.
- Mentor junior developers and enforce clean code practices.
- Conduct user testing to improve UI/UX.
- Stay updated on emerging frontend technologies.

**Web Developer** 2023

Freelance

Built and maintained custom web applications for clients, from requirements gathering to deployment, with a focus on responsive design and code quality.

## Skills

---

### Frontend Development

Expertise in web development technologies, including **React.js**, **React Native**, **Tailwind CSS**, **JavaScript**, and **TypeScript**, with a focus on building scalable, efficient, and user-friendly interfaces.

### Problem Solving & Troubleshooting

Skilled in debugging and solving complex issues in a fast-paced, results-driven environment.

### Technical Documentation

Strong ability to write clear technical documentation and communicate effectively with cross-functional teams.

### Project Coordination

Experienced in coordinating between development, marketing, sales, and stakeholders to align technical execution with business goals, clarify requirements, and ensure smooth project delivery.

## Education

---

**Bachelor Degree in Computer Science & Information Technology**

2019 – 2023

University of Basra

## Certificates

---

**Meta Front-End Developer**

Coursera 2023

### Version Control & Collaboration

Proficient in **Git** and **GitHub**, enabling efficient code management and seamless project tracking.

### Linux Operating System

Familiar with Linux environments, including system management, troubleshooting, and ensuring reliable system performance and stability.

### Language Proficiency

Arabic native and advanced English communication skills, both written and spoken, for effective interaction with international teams and clients.
